

TABLE OF CONTENTS

CHAPTER 1

INTRODUCTION.....	1-1
--------------------------	------------

CHAPTER 2

SHAFT CLASSIFICATION AND CHARACTERIZATION	2-1
2.1 SHAFT CLASSIFICATION.....	2-1
2.2 FOUNDATION STIFFNESS MODELING.....	2-2
2.3 LARGE DIAMETER SHAFT.....	2-2

CHAPTER 3

VERTICAL SIDE SHEAR AND TIP RESISTANCES OF	
LARGE DIAMETER SHAFTS IN CLAY.....	3-1
3.1 INTRODUCTION	3-1
3.2 LOAD TRANSFER AND PILE SETTLEMENT	3-2
3.3 DEVELOPED t-z CURVE RELATIONSHIP	3-5
3.3.1 Ramberg-Osgood Model for Clay.....	3-7
3.4 PILE TIP (SHAFT BASE) RESISTANCE IN CLAY	3-8
3.5 PROCEDURE VALIDATION.....	3-9
3.5.1 Comparison with the Seed-Reese t-z Curve in Soft Clay (California Test).....	3-9
3.6 SUMMARY.....	3-11

CHAPTER 4

VERTICAL SIDE SHEAR AND TIP RESISTANCES OF	
LARGE DIAMETER SHAFTS IN SAND	4-1
4.1 INTRODUCTION	4-1
4.2 PILE TIP (SHAFT BASE) RESISTANCE AND SETTLEMENT ($Q_T - z_T$) IN SAND	4-1

4.2.1	Pile Tip Settlement.....	4-5
4.3	LOAD TRANSFER ALONG THE PILE/SHAFT	
	SIDE (VERTICAL SIDE SHEAR).....	4-6
4.3.1	Method of Slices for Calculating the Shear Deformation and Vertical Displacement in Cohesionless Soil.....	4-6
4.3.2	Ramberg-Osgood Model for Sand	4-11
4.3.3	Procedure Steps to Assess Load Transfer and Pile Settlement in Sand (t-z Curve).....	4-12
4.4	PROCEDURE VALIDATION.....	4-15
4.5	SUMMARY.....	4-16

CHAPTER 5

MODELING LATERALLY LOADED LARGE DIAMETER SHAFTS USING THE SW MODEL..... 5-1		
5.1	INTRODUCTION	5-1
5.2	THE THEORETICAL BASIS OF STRAIN WEDGE MODEL CHARACTERIZATION.....	5-2
5.3	SOIL PASSIVE WEDGE CONFIGURATION	5-3
5.4	STRAIN WEDGE MODEL IN LAYERED SOIL.....	5-5
5.5	SOIL STRESS-STRAIN RELATIONSHIP	5-7
5.5.1	Horizontal Stress Level (SL).....	5-9
5.6	SHEAR STRESS ALONG THE PILE SIDES (SL _t).....	5-11
5.6.1	Pile Side Shear in Sand	5-11
5.6.2	Pile Side Shear Stress in Clay.....	5-11
5.7	SOIL PROPERTY CHARACTERIZATION IN THE STRAIN WEDGE MODEL.....	5-12
5.7.1	Properties Employed for Sand Soil	5-13
5.7.2	The Properties Employed for Normally Consolidated Clay	5-14
5.8	SOIL-PILE INTERACTION IN THE STRAIN WEDGE MODEL	5-16
5.9	PILE HEAD DEFLECTION	5-19
5.10	ULTIMATE RESISTANCE CRITERIA IN	

STRAIN WEDGE MODEL.....	5-20
5.10.1 Ultimate Resistance Criterion of Sand Soil.....	5-20
5.10.2 Ultimate Resistance Criterion of Clay Soil.....	5-21
5.11 VERTICAL SIDE SHEAR RESISTANCE	5-22
5.12 SHAFT BASE RESISTANCE	5-22
5.13 STABILITY ANALYSIS IN THE STRAIN WEDGE MODEL	5-24
5.13.1 Local Stability of a Soil Sublayer in the Strain Wedge Model.....	5-24
5.13.2 Global Stability in the Strain Wedge Model.....	5-24
5.14 SUMMARY.....	5-25

CHAPTER 6

SHAFTS IN LIQUEFIALE SOILS	6-1
6.1 INTRODUCTION	6-1
6.2 METHOD OF ANALYSIS.....	6-3
6.2.1 Free-Field Excess Pore Water Pressure, $u_{xs, ff}$	6-4
6.2.2 Near-Field Excess Pore Water Pressure , $u_{xs, nf}$	6-5
6.3 CASE STUDIES	6-12
6.3.1 Post-Liquefaction Response of Completely Liquefied Nevada Sand	6-12
6.3.2 Post-Liquefaction Response of Completely Liquefied Ione Sand	6-13
6.3.3 Post-liquefaction Response of Partially and Completely Liquefied Fraser River Sand	6-13
6.4 UNDRAINED STRAIN WEDGE MODEL FOR LIQUEFIED SAND	6-13
6.5 SOIL-PILE INTERACTION IN THE SW MODEL UNDER UNDRAINED CONDITIONS	6-16
6.6 SUMMARY.....	6-17

CHAPTER 7

FAILURE CRITERIA OF SHAFT MATERIALS	7-1
7.1 INTRODUCTION	7-1

7.2	COMBINATION OF MATERIAL MODELING WITH THE STRAIN WEDGE MODEL.....	7-3
7.2.1	Material Modeling of Concrete Strength and Failure Criteria	7-4
7.2.2	Material Modeling of Steel Strength.....	7-7
7.3	MOMENT-CURVATURE (M-Φ) RELATIONSHIP	7-9
7.4	ANALYSIS PROCEDURE	7-10
7.4.1	Steel Shaft	7-10
7.4.2	Reinforced Concrete Shaft	7-15
7.4.3	Concrete Shaft with Steel Case (Cast in Steel Shell, CISS).....	7-18
7.4.4	Reinforced Concrete Shaft with Steel Case (Cast in Steel Shell, CISS)	7-20
7.5	SUMMARY	7-21

CHAPTER 8

	VERIFICATIONS WITH FIELD LOAD TESTS	8-1
8.1	INPUT DATA.....	8-1
8.1.1	Shaft Properties	8-1
8.1.2	Soil Properties.....	8-1
8.1.3	Liquefaction analysis (for saturated sand)	8-2
8.1.4	Loads (shear force, moment and axial load)	8-2
8.1.5	Earthquake Excitation (Liquefaction)	8-2
8.2	LAS VEGAS FIELD TEST (SHORT SHAFT).....	8-3
8.3	SOUTHERN CALIFORNIA FIELD TEST (SHORT SHAFT).....	8-5
8.4	TREASURE ISLAND FULL-SCALE LOAD TEST ON PILE IN LIQUEFIED SOIL	8-6
8.5	COOPER RIVER BRIDGE TEST AT THE MOUNT PLEASANT SITE, SOUTH CAROLINA SITE.....	8-8
8.6	UNIVERSITY OF CALIFORNIA, LOS ANGELES (UCLA) FULL-SCALE LOAD TEST ON LARGE DIAMETER SHAFT.....	8-11
8.7	FULL-SCALE LOAD TEST ON A BORED PILE IN LAYERED SAND AND CLAY SOIL.....	8-13

8.8	SUMMARY.....	8-13
-----	--------------	------
